

Does anyone in your family suffer from asthma or allergies?

Are you constantly sanitizing every inch of your home?

Are you always trying to cover up lingering odors?

Are you concerned about mold and bacteria growth in your home?

What is hiding in your home?

Refresh Air Purification can solve these issues and more.
We bring the outdoor air inside.

How do we do it?

Outside, the sun reacts with minerals on the earth and the reaction creates a level of Hydrogen Peroxide, the same chemical found in the brown bottle at the pharmacy. This reaction is called Photo Hydro Ionization. Refresh Air uses a UV bulb to react to 5 minerals on our patented cells to create the same reaction. Your air handling system, collects this vapor H₂O₂ and sends it out into your home to create cleaner, fresher air that sanitizes, kills viruses, mold, mildew and eliminates odors in your home.

What else could you need?

Our Refresh Air Platinum has added an electronic ionizer. This ionizer sends out positive and negative ions that electronically charge dust and floating allergens in your home. The particulate is then attracted to other particles and the bigger heavier clumps of dust and allergens get big enough to drop to a surface or go into your HVAC systems return air system.

Money Back Guarantee

All Refresh Air Products come with a 30 day money back satisfaction guarantee. If you are not happy with Refresh Air. Your Refresh Air dealer will uninstall the product and give you 100% of your money back. Once installed you will have a 5 year warranty on the power supply and 2 years on the catalyst. After 2 years call your contractor and they will replace the catalyst to maintain your clean fresh sanitary home

AIR PURIFICATION

- **Increased Ionized Hydro-Peroxide Output**
- **New Enhanced Catalyst With Zinc For Faster Kill Rates**
- **Easier, Faster, No Tool Cell Replacement**

The REME HALO® by RGF® is the next generation of IAQ technology. RGF has redesigned their REME HVAC unit with higher Ionized Hydro-peroxide output, which gives faster kill rates for microbials in the air as well as on surfaces. Also, this higher output drops more particulate from the air bringing relief to those who suffer from allergies and other respiratory issues.

Quick Release Feature

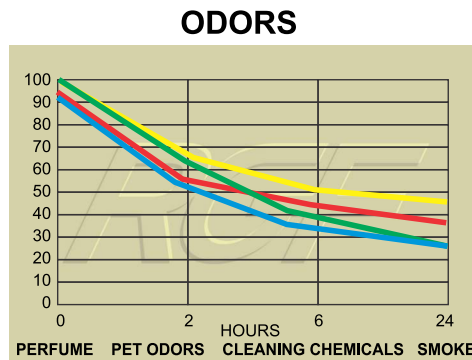

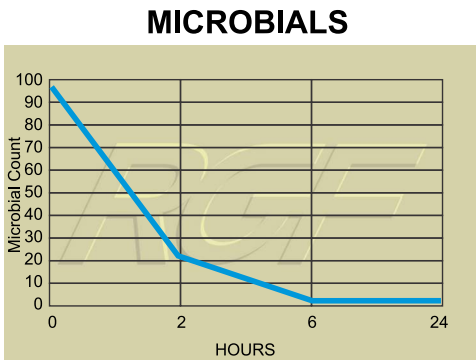

The REME HALO® now features a quick release design for easy removal of the housing to allow easy replacement of the REME cell.

Adjustable Output

The REME HALO® incorporates an adjustable shroud, which allows the customization of the AOP output.

The REME HALO® by RGF® is designed to eliminate sick building syndrome risks by reducing odors, air pollutants, VOCs (chemical odors), smoke, mold, bacteria and viruses. The REME HALO® units are easily mounted into air conditioning and heating systems air ducts where most sick building problems start. When the HVAC system is in operation, the REME HALO® unit creates an Advanced Oxidation Plasma consisting of Ionized Hydro-peroxides, Super oxide ions and Hydroxide ions. All are friendly oxidizers. By friendly oxidizers, we mean oxidizers that revert back to oxygen and hydrogen after the oxidation of the pollutant.

SPECIFICATIONS

•Hydroperoxide Ion distribution:	Distributed through air handler
•Super Oxide Ion distribution:	Distributed through air handler
•Hydroxide Ion distribution:	Distributed through air handler
•Installation:	Installed in HVAC duct or plenum
•Electrical:	24 VAC 0.7 Amps 17 Watts
•Materials:	Aluminum and Polymers
•REME Cell Replacement	Recommended after 25,000 hrs
•HVAC Blower Size	1,000 - 6,500 CFM
